Degree in High School - ICSE                                               May 2017 - May 2018
*Percentage: 95.67%%*

## SKILLS

| | |
|---|---|
| Programming Languages: | Java, HTML, CSS ,Javascript |
| Libraries/Frameworks: | React |
| Tools / Platforms: | VS code, IntelliJ |

## PROJECTS / OPEN-SOURCE

**Quote Generator | Link**                                                     *Javascript, React*
- Designed and developed a web application that generates random inspirational quotes using the Quotable API.
- Utilized HTML, CSS, JavaScript, and the React library to create a responsive and interactive user interface for the application.
- Added functionality to enable users to copy their favorite quotes to the clipboard with a click, enhancing user convenience.

**Analog and Digital Clock | Link**                                       *HTML, CSS, JAVASCRIPT*
- Implemented rotating clock hands (hour, minute, and second)
- Used CSS transitions to simulate the passage of time.
- Utilized avaScript to dynamically update the clocks time, ensuring accurate timekeeping based on the users device
  time settings

**Alarm Sync | Link**                                                                      *JAVA*
- Designed and developed a Java-based application that allows users to set and manage alarms conveniently.
- Created an intuitive and user-friendly graphical user interface (GUI) that enables users to easily set alarm times easily, or set them manually
- Incorporated standard dismiss functionalities, allowing users to stop the alarm when they are no longer needed.

## CERTIFICATIONS

- The complete Web Development Bootcamp - **Udemy**
- Data Structures and Algorithm in Java for Intermediate level - Great Learning Academy.
